

TIPS AND TRICKS FOR USING AI

How to prompt well.

Give AI:

- 1) a role
- 2) a task
- 3) the context
- 4) specific information
- 5) your intention
- 6) a format for the answer

ALWAYS BE AS SPECIFIC AS POSSIBLE

Example: You want feedback on an assignment

A role: You are my teacher from the English dept.

A task: Provide feedback on my assignment.

The context: I am a UCPH student in (topic).

Specific information: I am writing an assignment on (topic)

Your Intention: You want to know if your text is coherent.

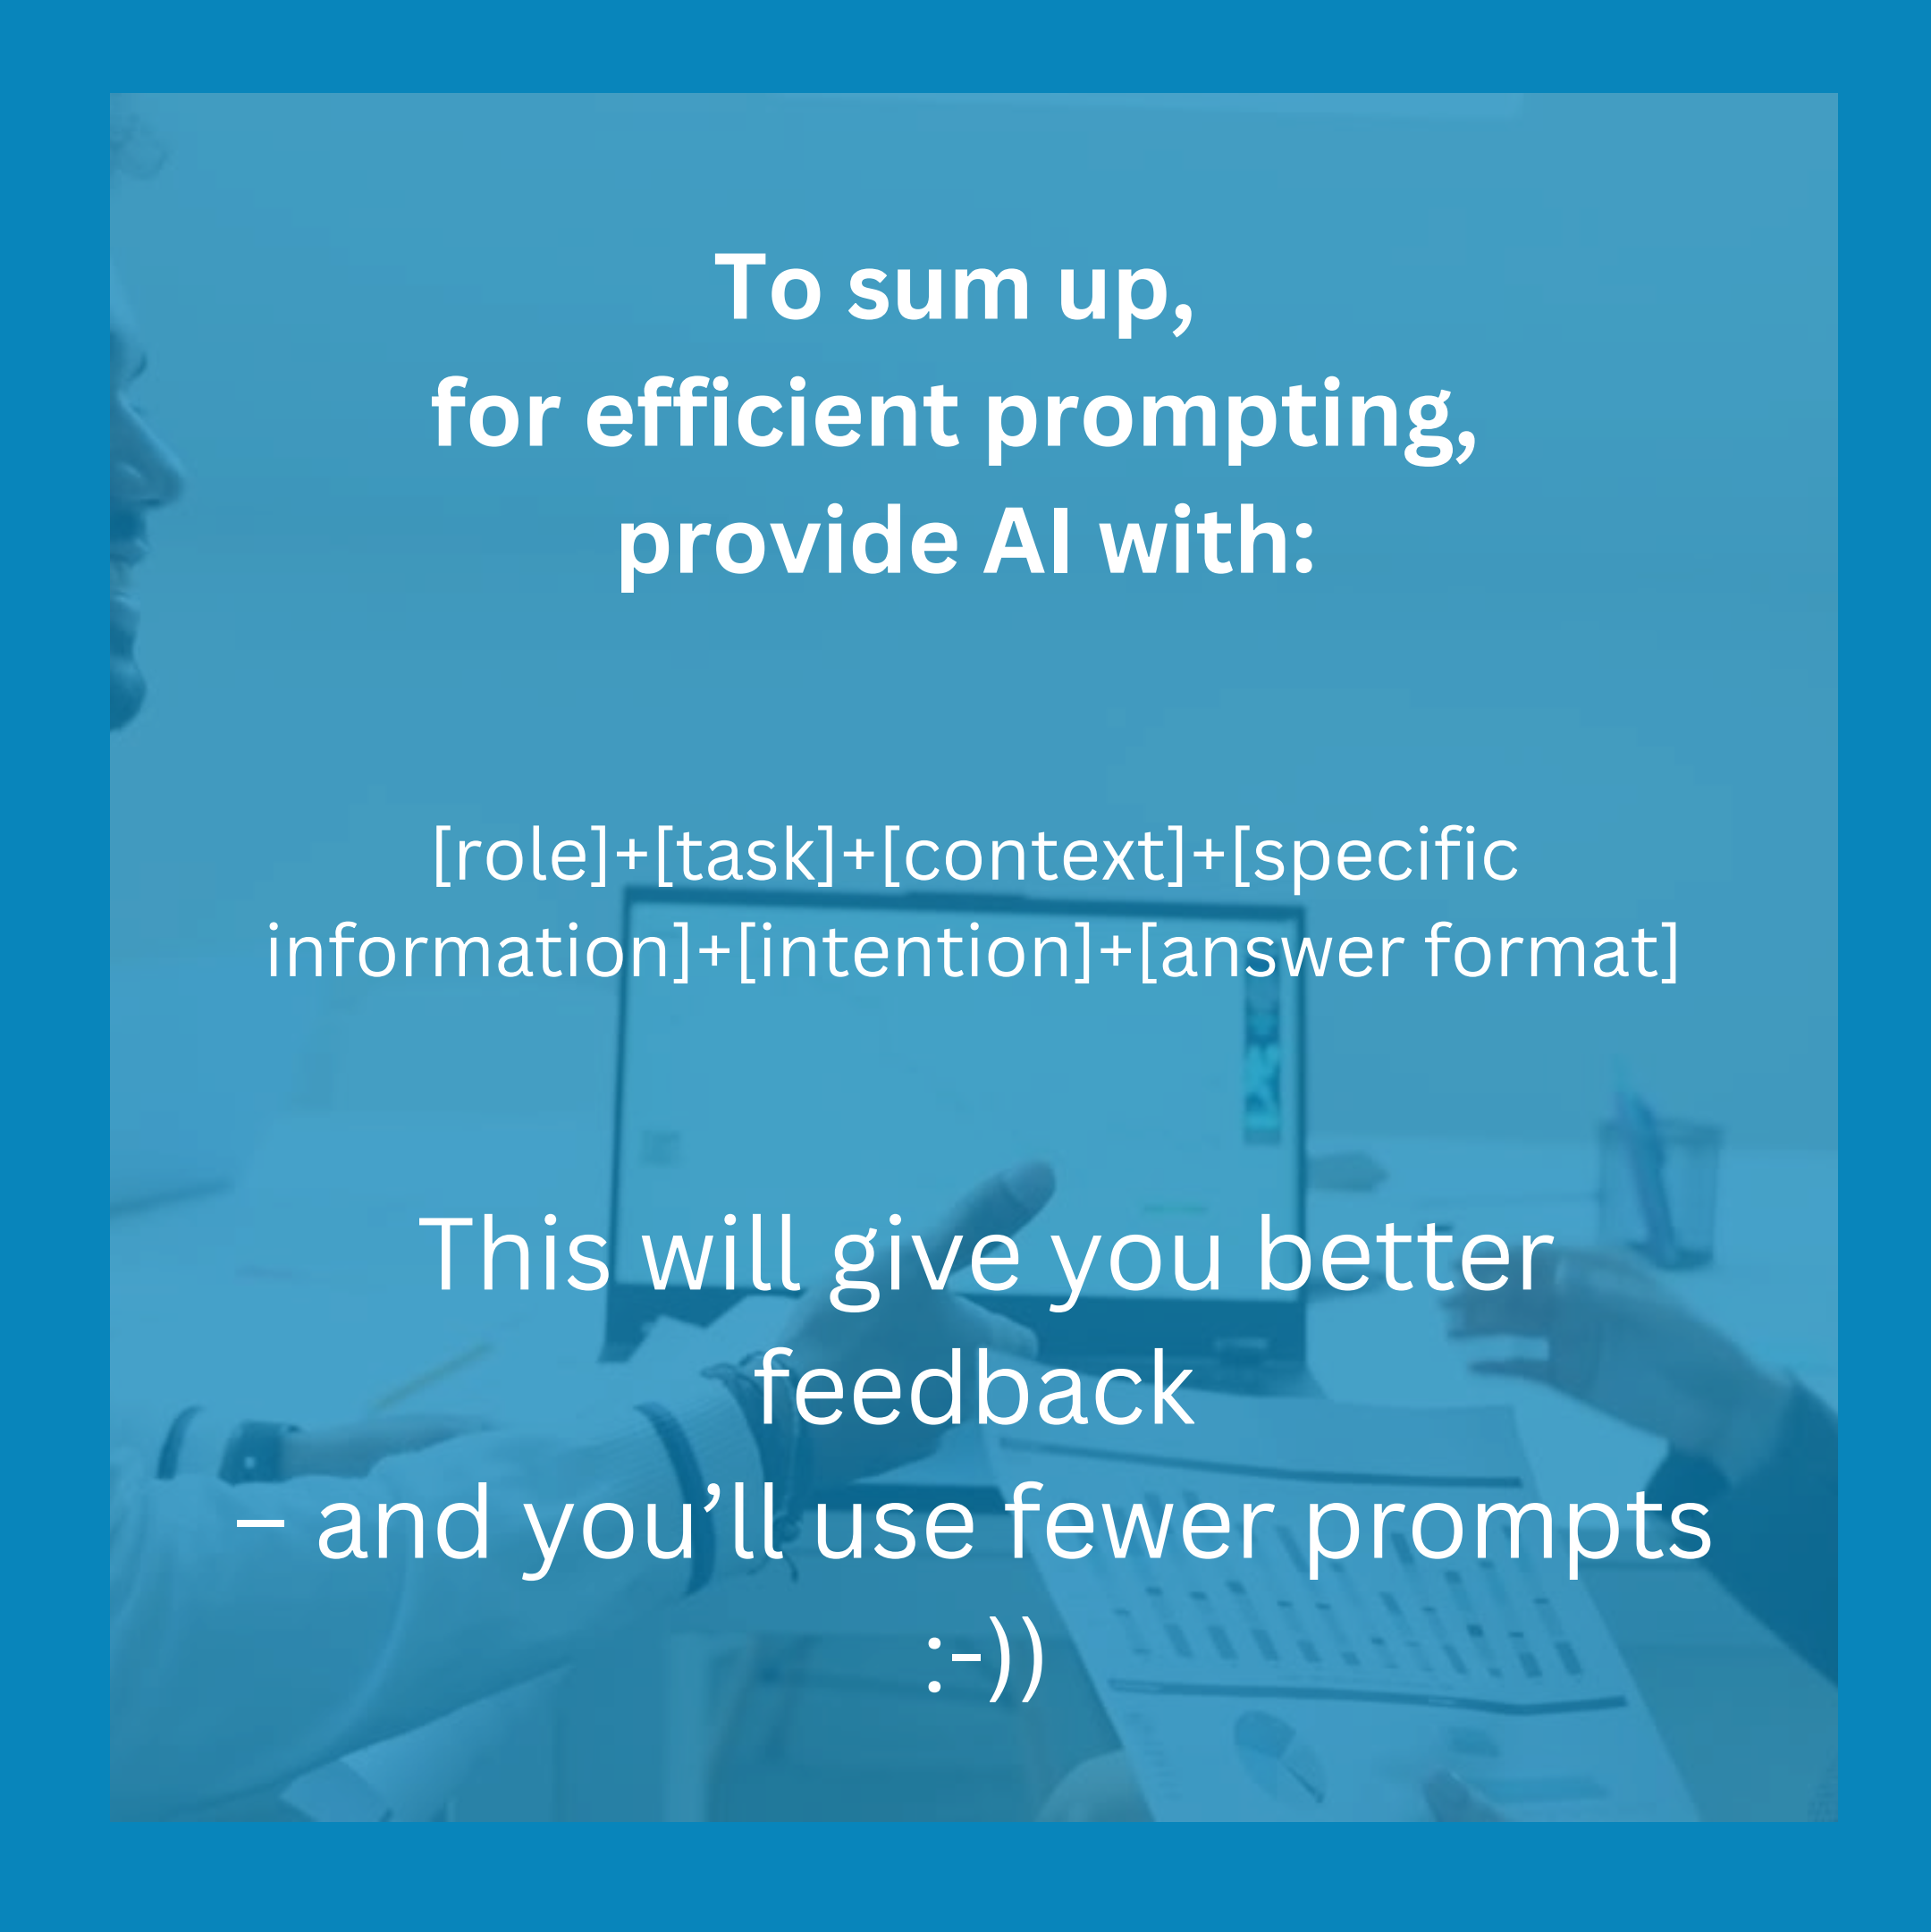

An answer format: E.g. a bulleted list.

PROMPT... GO TO NEXT SLIDE

Don't write: "I would like feedback on this assignment."

Try writing something like this:

"Hi AI, I'm a 3rd semester student at UCPH at (education). I'm about to write an assignment on (short description of the scope, topic etc). I want to know if my text is coherent – and what I can do to improve it. Please, give me feedback in 5 bullet points.

**To sum up,
for efficient prompting,
provide AI with:**

**[role]+[task]+[context]+[specific
information]+[intention]+[answer format]**

**This will give you better
feedback
– and you'll use fewer prompts
:-))**

A photograph of a man with grey hair, wearing a light-colored long-sleeved shirt, sitting on a wooden bench outdoors. He is looking down and to the side with a thoughtful or perhaps distressed expression, his right hand resting near his face. The background is a soft-focus view of green foliage. The entire image is overlaid with a semi-transparent blue filter.

Og i øvrigt... du kan få bedre
svar ved at spørge på
